X = not required / ✓ = required

All visa information is provided in good faith and is believed to be correct; however requirements/recommendations can change at very short notice. Visa requirements may vary depending on Passport Nationality and your originating country. We keep our visa information up-to-date as much as possible, but rules do change so it is very important that you also check with your local embassy.

USA and Canadian citizens can obtain their visas on arrival into most of the above listed countries for a fee. Please contact us or the local embassy for the cost of the visa or for the visa requirements if you are travelling on another nationality of passport. (Passports must be valid for at least 6 months beyond your intended stay and contain sufficient blank VISA pages.)

Should you decide to obtain your visa prior to departure, please contact the local embassy or use a visa service such as:

VisaCentral
Various locations around the US
Tel: (877) 535-0688
Website: <http://visacentral.com/>

Travisa
Various locations around the US
Tel: (754) 206-0454 (Miami)
Website: www.travisa.com

(If you use a visa service, please call them first to verify the price and also how to ship your passport and visa forms to them.)

VISA AND VACCINATION REQUIREMENTS (cont'd)

NOTES:

- **ANTI-MALARIA** – Some form of anti-malaria medication is STRONGLY URGED. Anti-Malaria is a tablet not a vaccination.
- **YELLOW FEVER** – Some countries require **all travelers** to show proof of yellow fever vaccination before they can enter the country. Other countries require proof of vaccination **only if travelers have been in a risk area**, so if you are visiting multiple countries, the order of travel may be important. For a full list, please visit www.CDC.gov.

Proof of vaccination is not valid until 10 days after you get the vaccine, so plan to get the vaccine early if you need it.

- **OPTIONAL VACCINATIONS** - Hepatitis A, Hepatitis B, Typhoid, Tetanus, Polio and Meningitis

Please check with your local Health Department, the Centers for Disease Control and Prevention (Tel: 1-800-232-4636 [800 CDC INFO] or <http://wwwnc.cdc.gov/travel/destinations/list/>, your physician or our office, if you have any questions.
